

1.)  $\text{var } x = 5;$   
 $\text{var } f = \text{function}(y) \{ x - y \};$   
 $\text{var } x = f(9);$   
 $f(x)$

2.)  $\text{var } x = 5$   
 $\text{var } f = \text{function}(y) \{ \text{var } y = x * y; \text{function}(x) \{ x - y \} \};$   
 $\text{var } g = f(2);$   
 $g(5)$

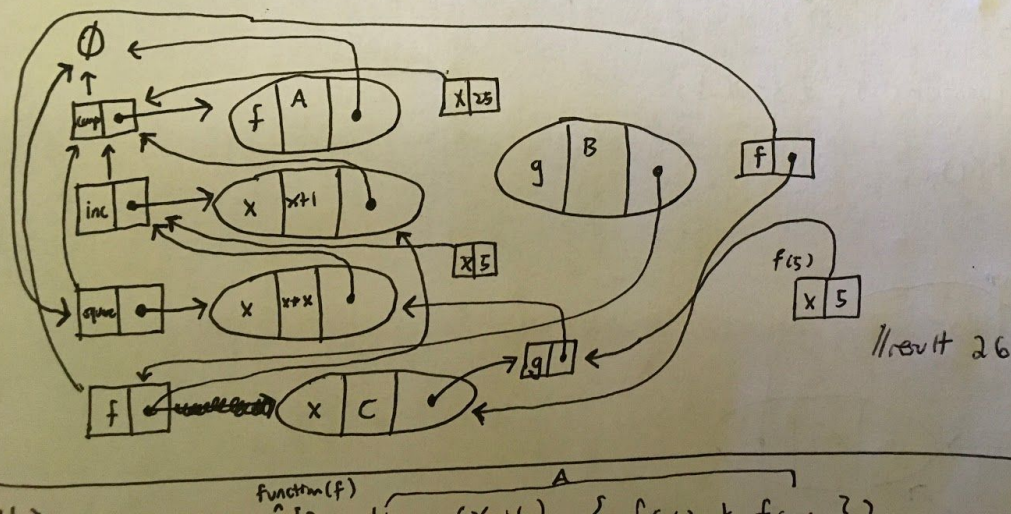

//result -5

```

3.) var comp = function (f) { function (g) { function (x) { f(g(x)) } } }
    var inc = function (x) { x+1 };
    var square = function (x) { x*x };
    var f = comp(inc)(square)
    f(5)

```
